

Silicon Metal to IMPORT from DPR KOREA

Final Goal	Importation to any country of Silicon Metal
Author	Kohler Patrick, Business Agent and Consultant in Switzerland
First Date	2009-02-26
Deadline	Not specified
Date of Last Modifications	2009-02-26
Revision N°	1
News related to this project	None
Other informations	None
Remarks	None

General Informations	Silicon metal, also called crystal silicon or industrial silicon.
Typical Application	<p>Mainly used in metallurgical industry as additive of nonferrous radicle alloy;</p> <p>To add it to nonferrous metal for heighten the metals strength, hardness and wear resistance, also heighten foundry and welding capability. To apply to not only alloy metal agent for silicon steel, special type steel, but also aluminum alloy and casting industry;</p> <p>After technique processing, it can be made into monocrystalline silicon for electrical industry like Sun Power cells.</p> <p>In chemical industry, used for the production of silicon radicle compound, eg. silicon alkyl, silicon ketone, organic silicon, silicon oil etc.;</p> <p>To be used in the production of semiconducting silicon, silicon ceramic, silicon nitride etc.</p>

Purity	Si 98.5% Fe 0.5% Al 0.5% Ca 0.3%
Price	1'980 USD / ton
Importation Route	From Dalian CIF, China
Quantity	100 tons / month
Conditions	Expendable after first shipment
